

SCALE CHECK: this bar must measure EXACTLY 200.0 mm

Aprillag tag36h11 ld 0 -- interceptor target placard. PRINT AT 100% / ACTUAL SIZE. Do NOT 'fit to page' or 'scale to fit'.
MATTE toner/laser on plain bond. NO gloss, NO lamination (specular sun glare wipes out the black/white contrast the decode needs).
Trim on the dashed line: sheet = 450 x 450 mm. BLACK SQUARE (= pupil-apriltags tag_size) = 350.0 mm, cell = 43.75 mm.
ACCEPTANCE: measure the black square edge with a steel tape, 350.0 +/- 1.0 mm, both axes, or reprint. Print TWO -- one per panel face, both right-reading (docs/placard_mount.md 3.6).
